

Public Notice Notice of Filing

Notice is hereby given that McLean County is filing with the Illinois Commerce Commission an application for approval of a modification of a 9-1-1 Emergency Telephone Number System.

Said filing will consist of a modification of a currently operational county wide Enhance 9-1-1 system. This system has been operational since February 2002 and services the entire county. The county operates one main PSAP and a manned Backup PSAP that covers 1081 square miles and a population of 165,000 people. With the selective router located in Bloomington and operated by Verizon. The system uses CML 9-1-1 equipment complemented by a TriTech CAD and map. In addition McLean County has 7 wireless carriers with five being Phase 2 and two being Phase 1. These carriers are now completing Phase 2 and McLean County expects to be completely wireless Phase 2 by December of 2004. The system is funded with a wire line surcharge of \$1.25 and wireless surcharge of \$.50.

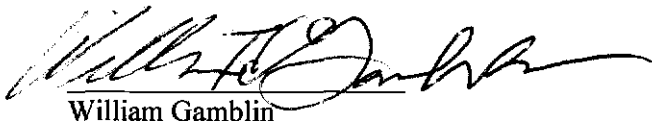

When the system was brought on line several central office areas shared with Woodford County could not be placed on the selective router causing calls for those areas to be directed to either Woodford or McLean County. Each area was directed to the selected county based on which county contained the largest number of access lines.

It is the intent of this modification to take advantage of the selective router that is now available to Woodford and split the shared central office areas so as to selectively route each access line to the proper county PSAP. This modification is being completed in cooperation with Woodford County, McLean County, and the Illinois Commerce Commission in order to provide a more efficient 9-1-1 system for those citizens living with in these areas.

If you wish to object to the application, it is required that you do so within ten (10) days from the date of this notice by writing to the:

9-1-1 Program
Illinois Commerce Commission
527 East Capital Avenue
Springfield, Illinois 62701

If no objections are filed, the application will be submitted to the Illinois Commerce Commission for approval of this modification of a currently approved 9-1-1 Emergency Telephone Number System.

William Gamblin
